Feature: Create Contact

Scenario Outline: Successful contact

Given I open the create contact page

When I type "<firstName>" into the

And I type "<lastName>" into the L

And I type "<primaryPhoneNumber>"

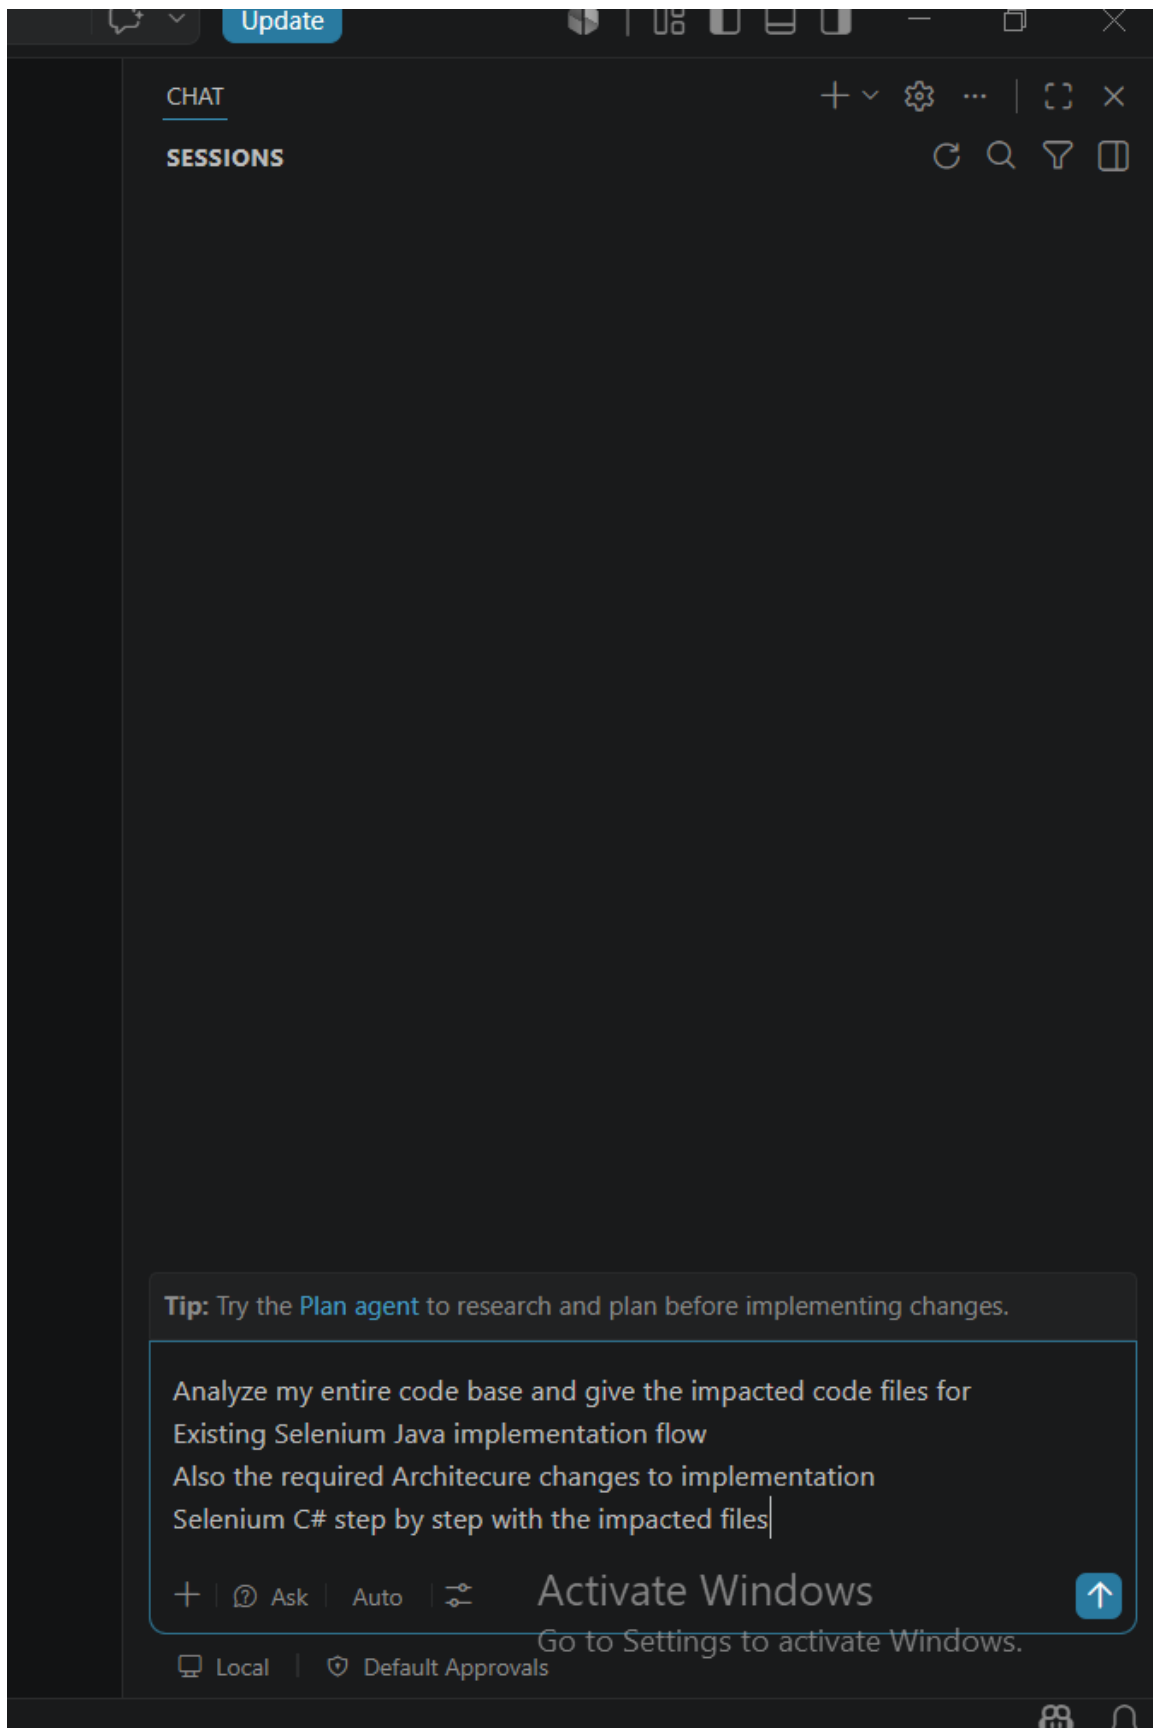

And I click the Create Contact but

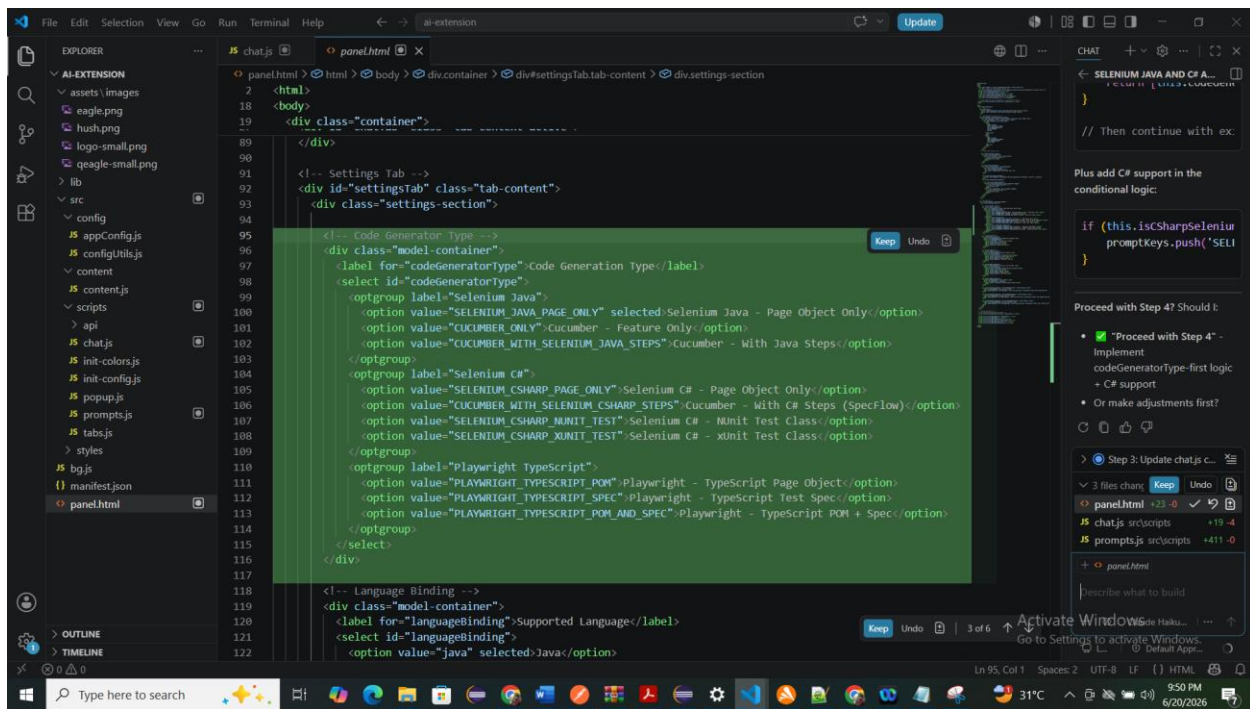

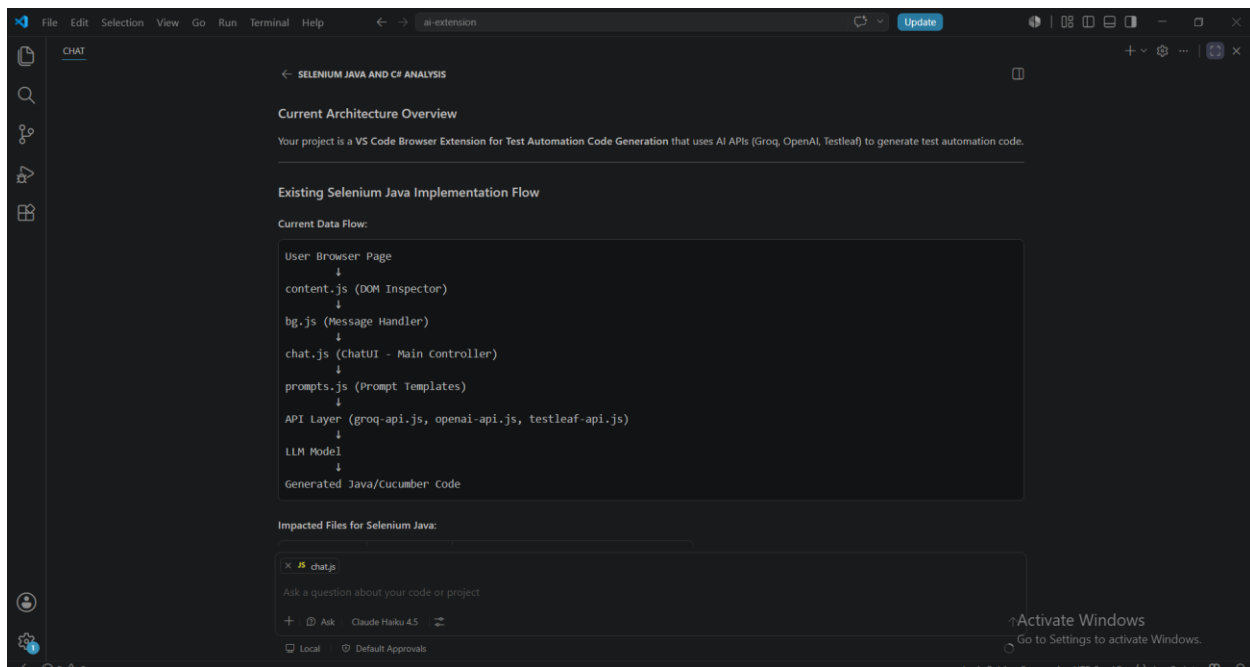

Then I should see the contact crea

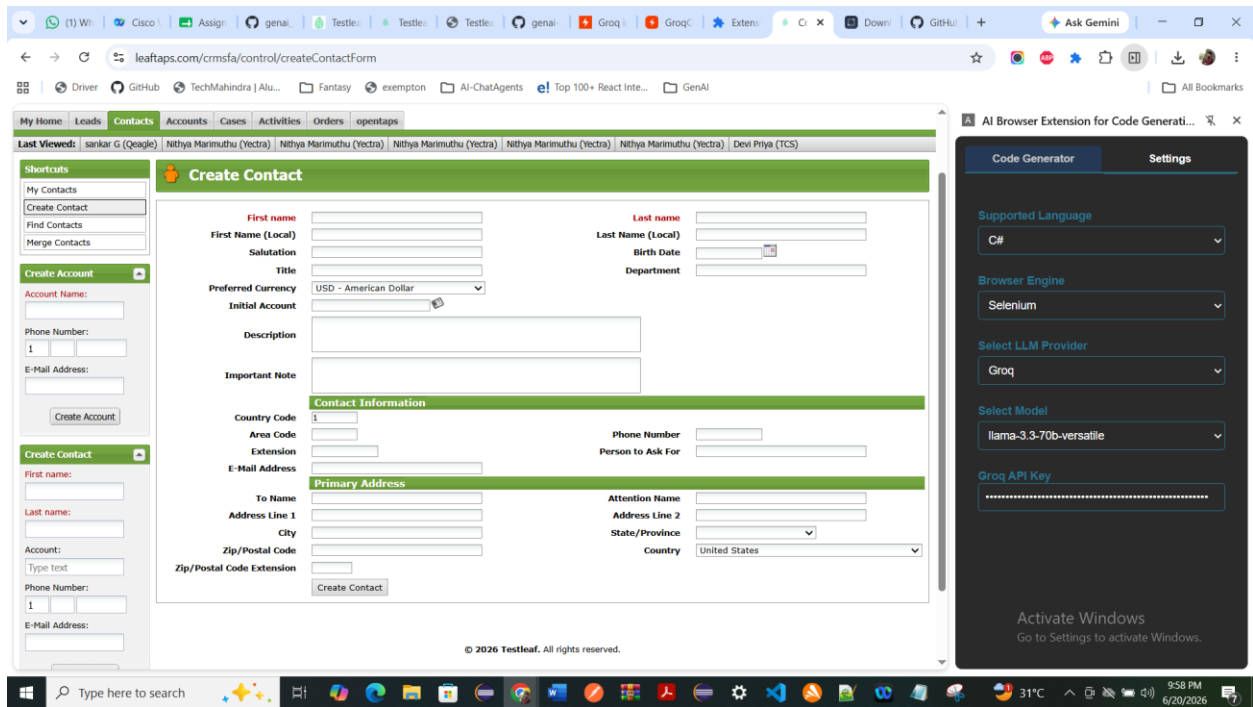

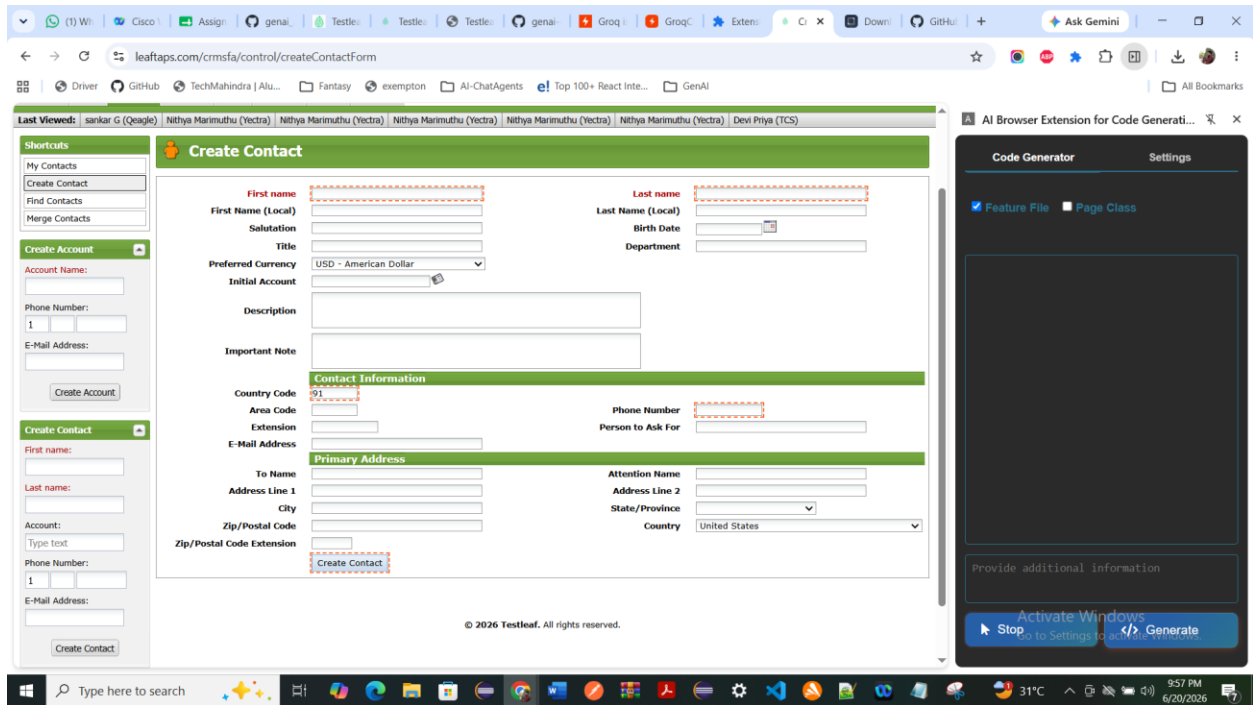

Examples:

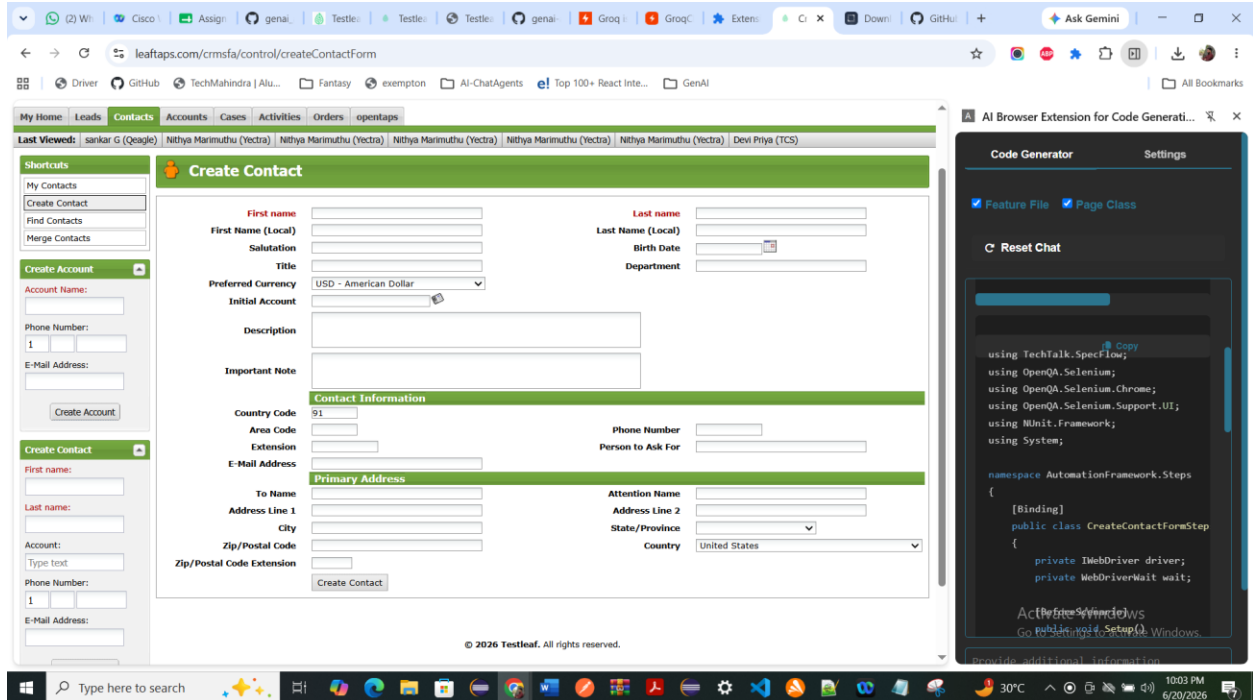

firstName	lastName	primaryPh
Ramesh	Kumar	9444444444
Suresh	Rao	990099009
Manish	Babu	789654321

Github Copilot

Feature: Create Contact Form

Scenario Outline: Successful contact creation with valid details

- Given I navigate to the create contact form page
- When I enter "<firstName>" in the first name field
- And I enter "<lastName>" in the last name field
- And I click the create contact button
- Then I should see the contact created successfully

Examples:

- | firstName | lastName |
- | Raman | Kumar |
- | Suresh | Babu |
- | Karthik | Raja |
